2026

Education at primary level in India provides a culturally sound environment for the children and instills the right values to help them grow both mentally and physically. The present series is one of its kind in the market with all the elements a child needs for holistic growth, like reading, writing and understanding. It is an introduction to English Alphabet, English Writing, Hindi Varnmala, Hindi Sulekh, Numbers 1 to 50, Colouring, English and Hindi Rhymes. All these books will aid children to improve themselves with fun-based learning. The exercises given after each topic, aid child to recapitulate and prepare for the next level of learning. 'Self-help' points for the teachers and parents will guide them to nudge children in the right direction.

The learning environment includes the physical environment, the integrated experiences, and the social environment that the child experiences. With the help of books, it's easy to create this environment. In this series, learning is imparted in the play-way method. Activities help the child to have a better understanding of the concept and develop an overall clarity. The beautiful illustrations hold the child's attention and this results in longer retention. This series encourages children to become acquainted with reading short sentences, learning to write in a stable manner, develop basic numeracy skills and learn to observe, think creatively and solve simple problems. Learning is at its best for this age group when it is both structured and exploratory.

Every language has its own system of sound structures that make up its words. Knowing the sounds represented by alphabets is thus crucial to listening, speaking and understanding a language. Thinkwell's PHONICS series meant for early learners gently introduces the sound of each English alphabet through familiar, everyday things around them. As in phonetics, the focus is on correct enunciation first (speaking); then identification of the sound with the alphabet (listening and understanding); and lastly, application, through simple pictorial exercises. Thinkwell's **Phonics** thus lays the foundation for learning and speaking English correctly. This series includes Notes to Teachers as basic guidelines of how best to utilise the content.

Science

Classes
1 to 8

BASED ON NEP
2020/ NCF 2023
GUIDELINES

Science is a dynamic discipline that underpins the physical, material, and biological world. Understanding and mastering the core concepts in this subject is crucial in generating fundamental knowledge needed for future technological advances. We firmly believe that science is more than just mugging up mundane theories. **Enlightening Science** is a series for classes 1 to 8 based on a theme-based integrated approach that nurtures creativity and curiosity. All the books in this series strictly follow the latest curriculum prescribed by the CBSE.

Unique Features

- ▶ **In Focus** provides a list of lesson objectives
- ▶ **Get Set Go** provides a warm-up activity to give each lesson a head start
- ▶ A visually pleasing layout with clear and colourful illustrations to attract the attention of young learners
- ▶ Accurately labelled diagrams to simplify complex concepts and processes
- ▶ Interesting **Activity-Time** helps the young learners to connect the topic with the real world by experimentation and observation
- ▶ **Extra Bit** provides fascinating facts to give an insight into the intriguing world of nature
- ▶ **Check your Progress** are in-text exercise to test understanding at each level
- ▶ **Through Science**, we work on knowledge and gain respect for nature
- ▶ **The Green Corner** sensitises learners toward the changing environment

This series of Maths books attempts to bridge the gap between the teacher and the student by incorporating the key recommendations of the National Education Policy (NEP) 2020. In view of the policy's perspective of holistic development of children, the National Curriculum Framework (NCF) 2023 has recommended curricular goals, competencies and learning outcomes. These learning outcomes have been aligned to the developmental domains such as physical, socio, emotional, ethical, cognitive, language and literacy, aesthetics, cultural and positive learning habits.

ARTWAY series is a comprehensive journey into the building blocks of art – elements of art and principles of design. The salient features of NEP 2020 as mentioned for ‘Art’ are as follows:

- ▶ Art integration is an essential part of experiential learning.
- ▶ Art-integrated education should be embedded in classroom transactions.
- ▶ Greater emphasis on inclusion of the Arts in Education programme, aligning to local and regional arts, recognising local talent pools – artists, artistes, and crafts persons.
- ▶ Arts in education addresses to encourage creativity and critical thinking, which will encourage logical decision-making and diversity of ideas.

The series ARTWAY for middle school describes the following in a lucid and comprehensive style.

- ▶ Elements of Arts
- ▶ Observational Drawing
- ▶ Know an Artist
- ▶ Exploring the Craft Tradition of India
- ▶ Applied Art and its demands in the Creative World

ART EDUCATION (Subject Code 502)

English Grammar

Classes
1 to 8

Grammar is at the core of English so it's important you learn it well! Grammar Tools, a grammar series for Grades 1-8, helps children learn English grammar and use it proficiently. With explicit focus on essential components like punctuation, sentence structure, and tenses, this series builds on the learners' Listening, Speaking, Reading, and Writing (LSRW) skills with ample practice, repetition, and progression. With Grammar Tools, learning grammar will never be the same again. It's informative, engaging, and a lot of fun! This series will help to get a clearer understanding of grammar and also help them avoid common mistakes.

General Knowledge

Classes
1 to 8

Updated as per
NEP & NCF

Thinkwell's General Knowledge is a series of 10 books for Classes 1 to 10. The series has been designed to foster and nurture children's curiosity through the comprehension of what, why, when, where, and how things happen around them. Cross-curricular references, carefully designed activities, grade-appropriate tasks, and colourful and attractive pictures make teaching and learning, interesting and retentive. The series also aims to create awareness about personal health and hygiene. The objective of the series is to introduce the students to emotions so that they can connect with their own feelings and are able to empathise with others.

With the rapidly changing world scenario, the students must ingrain technology as a part of life. *i Connect* computer series integrates theory with the practical world and fosters holistic learning. The series is based on Windows 10 and Office 2016. The books follow the latest syllabus and guidelines prescribed by the Central Board of Secondary Education (C.B.S.E.) and have been revised and updated to reflect the latest developments in the field of technology.

The concepts in the books are presented in a learner-friendly manner with ample screenshots and illustrations to aid a thorough understanding of the topic. The language is simple for easy comprehension. There is a wide variety of exercises to assess learners' knowledge from different platforms. We believe that the student-friendly, interactive approach of this series will ignite the curiosity of our readers and motivate them to expand their horizons.

English Conversation

Classes
1 to 8

Conversations indeed play a crucial role in shaping an individual's personality and character. Including important topics of everyday conversation and sensitising children towards current issues can have a positive impact on their development, helping them become empathetic individuals.

Considering children as independent entities and incorporating NCF (National Curriculum Framework) guidelines in creating a graded conversation course is commendable. Following the approach Thinkwell's English Conversation (Part 1 to 8) allows for creativity, making the learning process engaging and exciting for children.

Table Book

Reckoner table books have been purposely designed keeping the two different age groups in mind. This will help children to have a source of reference for updating their mathematical skills. Memorising multiplication tables serves as a building block for related Maths concepts like division, fractions, long multiplication and algebra taught in elementary school. These books due to their playway approach in helping students learn tables will ensure longer retention.

TITLES	ISBN	PRICE (₹)
Reckoner Tables 1 To 20	978-93-9536-312-9	145
Reckoner Tables 1 To 50	978-93-9536-313-6	155

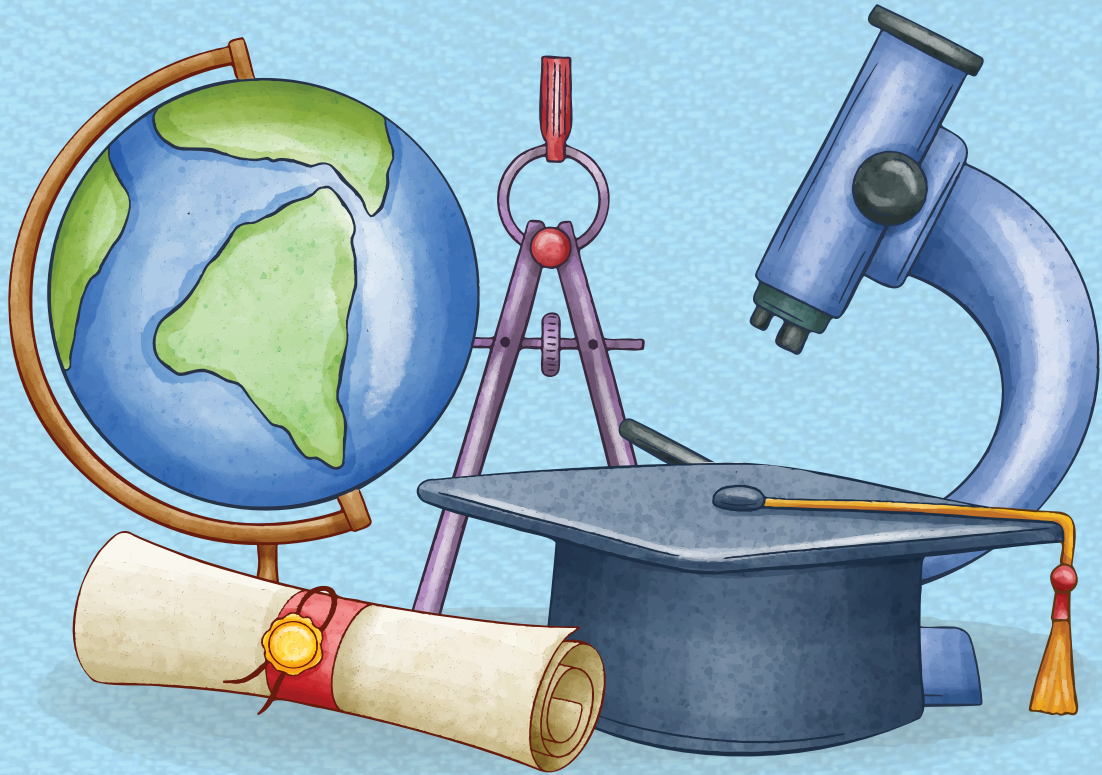

Moral values are immensely helpful for a person to live a healthy and peaceful life. Good habits developed since the childhood keep a person's ethical values high, as he progresses in life. When a person becomes used to good habits from childhood, he almost never fails to follow them when he grows up.

It's a well-known proverb that 'a healthy mind lives in a healthy body'. When the mind is healthy, a person makes decisions sensibly and does accordingly. Other moral values especially in the field of communication also contribute to its success.

All the books in the series give the learners plenty of opportunities to question, discuss and arrive at conclusions at each stage.
